Experience

Microsoft Power Platform Developer

MAR 2024 - PRESENT

TOTAL EBIZ SOLUTIONS

- Spearheaded the design and development of user-friendly Power Apps applications that solved complex business challenges across various industries, **contributing to half-million (SGD) revenue increase**.
- Independently led the end-to-end project lifecycle, from requirements gathering and solution design to app development, User Acceptance Testing (UAT), and securing sign-off, **ensuring successful deployment of applications** that met customers' business needs.
- Played a key role in pre-sales activities by delivering live demonstrations and proof-of-concept (POC) applications, helping clients visualize potential solutions and **closing multi-million-dollar projects**.
- Led training sessions and hackathons for customers focused on Process Automation in Microsoft Power Platform, **empowering clients to maximize the potential** of Microsoft Power Platform.
- Pioneered advanced front-end development in Power Apps by implementing responsive designs, dynamic layouts, and modern UI components, ensuring seamless user experiences across all devices and **enhancing application usability** for clients.

Data Analytics Analyst

AUG 2023 - FEB 2024

BAKER HUGHES

- Independently designed and developed multiple Power BI reports as an intern, which were **utilized globally by business users** for data-driven decision-making
- Executed data administrative tasks for Baker Hughes Power BI dashboards, which included data retrieval, validation, rectification, publishing, and ongoing maintenance, **ensuring accurate and real-time insights for global business operations**.

HTML / CSS	INTERMEDIATE	Quality Engineering

Notable Recent Project List

1. HR ERP System

FOOTBALL ASSOCIATION OF SINGAPORE

- Solo designed and developed a full-scale HR ERP system **overcoming internal challenges** while **ensuring seamless integration across seven applications**: HR Portal, Leave Management, Claims Management, Training Management, Manpower Requisition, and Performance Appraisal.
- Demonstrated accountability by independently managing development, guiding teammates, and supporting cross-functional needs, showcasing the **ability to handle multiple applications under high-pressure timelines**.

2. Booking System

SINGTEL

- Independently developed and delivered a modern, responsive booking system, replacing the legacy platform to **enhance the booking process and operational efficiency**.
- **Pioneered the use of responsive design** and complex UI components in Power Apps, proving that advanced front-end development is achievable within the platform.
- Took ownership of the project as a Junior Developer from design to deployment, demonstrating initiative, problem-solving skills, and the ability to **work independently under minimal supervision**.

3. Training and Hackaton

BANK ISLAM BRUNEI DARUSSALAM

- Conducted process discovery in banking, identifying inefficiencies and delivering tailored automation solutions with Power Platform, showcasing the **ability to analyze and address complex business challenges** effectively.
- Led a full-day workshop as the main trainer, training 50 bankers leveraging Microsoft Power Platform, demonstrating **strong facilitation skills** by understanding participants' challenges to ensure effective learning and adoption.

4. Leave Management System

INTERNAL HR TEAM

- Spearheaded the development and replacement of an outdated leave management system as a solo developer, implementing advanced reporting, UI enhancements, functionalities, and complex workflows to **improve efficiency and user experience**.

5. Global Project Tracker

ELECTROLUX

- Managed and implemented the end-to-end solution, from concept to deployment, streamlining global project management with automated registration confirmations, change alerts, and data export functionalities, **enhancing governance and efficiency**.

6. Request Daily Log

ELECTROLUX

- Led the end-to-end development, centralizing request data for real-time analytics, automating notifications, and integrating with Power BI for actionable insights, while **enhancing data accuracy, efficiency, and scalability**.

7. Multiple Proof of Concepts

YAYASAN MENDAKI, GXO, SINGAPORE PUBLIC UTILITIES BOARD, SINGAPORE PARLIAMENT

- Supported pre-sales engagements by developing multiple proof-of-concept (POC) applications leveraging Microsoft Power Platform for both government and private sectors, including solutions like Internal Management Applications, Welfare Management Systems, and Public Sector Infrastructure Applications, **contributing to the closure of multi-million-dollar projects**.
